-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1651

The amendments received 10/14/04 and 12/2/04 have been entered and claims 1-9, 11, 12 are currently pending in this application. The amended title and abstract are acceptable.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-9, 11, 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each of the following applies in all occurrences.

The claims as presented are confusing regarding what is the sample. Terms such as material and sample and solution have standard art recognized meanings which are not consistent with the usage in the claims. One standard way of stating a portion of a sample is determined may be stated as "dividing the sample into aliquots" and then determining an aliquot. In general, the material being determined is the sample, not a material. No new matter may be added to the claims.

The following is standard claim terminology:

1. A method for measuring a concentration of a sample in a solution, comprising:
 - (a) dividing a sample solution into at least two aliquots;
 - (b) measuring an optical rotation of an aliquot of the sample solution;
 - (c) reacting the aliquot of the sample solution with a reagent that reacts to alter the optical rotation of the sample solution to produce a reacted sample solution;
 - (d) measuring an optical rotation of the reacted sample solution;
 - (e) determining a difference in optical rotation produced by the reacting of step (c); and
 - (f) measuring the concentration of the sample in solution by correlating the difference determined in step (e) to a suitable standard.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
